

# EZYTAP<sup>TM</sup> OIL

EZYTAP  
cuts hard metals  
like knife in  
butter!!

**Highly Efficient  
Lubricant for**

- **Drilling**
- **Tapping**
- **Threading**

# EZYTAP OL

Ezytap-OL is formulated with high grade mineral oil and proprietary high performance additive package to achieve superior machining results. High viscosity oil helps in easy courage of tool without drain off. Ezytap-OL forms a protective film on the metal surface and tool. Active materials in the formulation proves it's effectiveness deep into the cut. Chips are prevented from welding and easily removed, eliminates galling and reduces tool breakage.

## Advantages

- Extended tool life.
- Excellent thread finish.
- Substantial reduction of force and torque.
- Easy removal of chips.
- Prevents galling and seizing of metals.
- Increased production rate.
- Improves cutting accuracy.

## Application

- Hand tapping
- Radial tapping
- Tapping machine with attachment
- Gang tapping.

## Other Specialty Lubricants

- Extreme Pressure Greases
- Multipurpose Greases
- High Temperature Non Melt Greases
- Aerosols
- Synthetic Greases
- Powder and Anti-seize Compounds
- Silicone Compounds and Greases
- Synthetic Chain Oils
- Mineral and Synthetic Gear Oils
- Mineral and Synthetic Hydraulic Oils
- Neat and Soluble Metal Working Fluids
- Die Casting Lubricants
- Drawing Lubricants
- Forging Compounds
- Solvent and Water Base Industrial Cleaners
- Rust Preventives

Our range of lubricants are serving numerous industries and have provided superior performance and results when compared to conventional lubricants. Experience the advantage and savings that are provided by speciality lubricants. For learning and knowing how you can implement speciality lubricants in your long term plan please contact us at :
